

Optical Termination Box 12 Port Sliding Type is a fiber optic distribution unit designed for terminating, managing, and protecting up to 12 fiber cores. Featuring a sliding tray mechanism, it allows easy access for installation, splicing, and maintenance without disturbing existing connections

Product Specification

Rugged Case
Sliding Style Rackmounted Model and Compatible with 19" Rack
24 Ports Fiber Capacity
Initial Installation Kit included
Adapter , Pigtails and Sleeve are included
Compact Design
Easy Installation and Maintenance
Designed for Intra-building, Data Center, or Backbone Company Network Distribution
Capacity: 12 Ports
Adapter Type: SC Simplex / LC Duplex (optional)
Installation: Wall-mounted / indoor
Material: Metal / ABS Plastic
Cable Entry: Top or bottom entry
Color: White / Black
Protection Level: Indoor use (dust protection)

Key Features

12 Port Capacity
Supports up to 12 fiber connections (SC/LC adapters depending on configuration).
Sliding Tray Design
Smooth pull-out system for convenient access during splicing and maintenance.
Compact & Space Saving
Ideal for wall-mounted or indoor installations with limited space.
Durable Construction
Made from high-quality metal or ABS (depending on model), ensuring long-term durability.
Cable Management System
Equipped with cable routing guides, splice holder, and protection sleeves.

Applications

FTTH (Fiber To The Home) installations
LAN / WAN fiber optic networks
Telecom rooms & data centers
Fiber distribution and termination points
